

**Co-creating Welfare
Seminar on how to use co-creation to develop
new welfare services
Tuesday the 9th of July**

The Co-creating Welfare project was created to serve local welfare services like elderly homes, hospitals and schools, that want to work in a closer dialogue with citizens to co-create future welfare services.

The Co-creating Welfare project has developed training course material as well as a co-creation concept with guidelines, good practice examples and recommendations, which can help local welfare services to run co-creating processes with citizens and develop welfare services that correspond better to the citizens' needs, and therefore are more sustainable.

www.ccw-project.eu

Within the scope of the Co-creating Welfare project, we are organising a conference to show the results from the project, as well as debating and raising the awareness on how local welfare services can apply co-creation processes and become more sustainable.

**Venue:
South Denmark European Office (SDEO)
Avenue Palmerston 3
1000 Brussels**
